

Your route to fair heat network charges

Clearer tariffs, smarter fuel procurement, and full confidence in future-proofing your heat network. Insite Energy can help you take control of your heat network costs, without the guesswork.

ACT NOW

Waiting could cost you more than money

With Ofgem's new heat network regulations expected to come into force in 2026, reviewing your tariffs and procurement strategy isn't just smart, it's essential.

What's currently proposed

Cost-reflective and transparent tariffs.

Network efficiency reporting.

Price monitoring and benchmarking.

Potential price investigations from 2027.

TARIFF REVIEW

Pricing that reflect your real-world costs

Unclear or outdated tariffs can cause complaints or financial shortfalls. We help you set fair, transparent charges regularly, based on how your network is actually performing.

Why it helps

Avoid under- or over-recovery of costs.

Build trust with residents through clear pricing.

Prepare for impending regulations.

Make informed decisions based on real data.

What you'll get with Insite's tariff review:

- ✓ Unit rate & daily standing charge proposal
- ✓ Clear tariff breakdown & notification letter issued to residents

ENERGY BROKERAGE

Fuel procurement that works for your network

Energy costs shape the heat charges to your residents. We can help you buy better; balancing price, risk, and long-term value with a strategy that's easy to explain and ready for audit.

Why it helps

Avoid overpaying for incoming fuel.

Reduce exposure to market volatility.

Support fair, transparent tariff setting.

Expert market monitoring ahead of contract renewals.

What you'll get with Insite's energy brokerage:

- ✓ Supplier quotes
- ✓ Market comparisons
- ✓ Fixed or flexible contract options
