

Tariff breakdown for pay-as-you-go residents at Cityscape

Insite Energy work on behalf of your heat provider, Rendall & Rittner, to provide metering and billing services to you. Below is an explanation of your heat tariff calculations. The rates applied by your heat supplier are solely determined to recover all the costs incurred through operating a heat network, and your heat supplier does not profit from the operation of the heat network.

The wholesale energy price cap

The Energy Bill Relief Scheme (EBRS) has been replaced by the Energy Bill Discount Scheme (EBDS), and is in place from 1st April 2023 until 31st March 2024. Under this scheme, support is only provided if the wholesale gas price is above 10.7p/kWh. As the gas contract for your heat network is above this rate, Horizons Tower has received an EBDS discount of 0.697p/kwh and has been applied to your new heat tariff's unit rate. Normally, we would prefer to notify you with 30 days' notice prior to the changing of your rates, however, we didn't want to delay the passing on of the discount any further. Your new rates took effect from 24th April 2023.

Your unit charge breakdown (percentage of apportioned costs)

23.46p/kWh

The average operational costs for a heat network equates to 56% of the unit charge breakdown.

Your daily standing charge breakdown (pence per day)

46.23p/kWh

⚠ Please note, your heat supplier does not profit from the operation of your heat network

Standard components of your heat tariff

Your **unit charge** covers the bulk cost of the energy generated in the communal plant room. It also includes any associated heat losses between the supply point and your home. Your energy consumption is measured via the heat meter installed in your home, so you only pay for what you have used. You are charged for every kilowatt-hour (kWh) consumed within your property.

Your **daily standing charge** is the fixed charge passed on by your heat provider, which covers the cost of operating the heat network and delivering energy to your home. This is an annual fixed amount that is payable every day by all residents regardless of how much energy they use.

Depending on your heat provider, the costs associated with running and maintaining the heat network will either be included within your building service charge or your heating and hot water daily standing charge.
