

# 23rd April 2024 - Tariff breakdown

## Mount Battenhall

MINI GUIDE

Insite Energy work on behalf of your heat provider, Mount Battenhall Management Co. Ltd , to provide metering and billing services to you. Below is an explanation of your heat tariff calculations. The rates applied by your heat supplier are solely determined to recover all the costs incurred through operating a heat network, and your heat supplier does not profit from the operation of the heat network.

### Your new energy tariff broken down

An increase in the heat unit charge is due to an increase in the gas unit rate used in the previous tariff review. The Increase in the standing charge is due to an increase in the gas standing charge used in the previous tariff review. Please note the previous tariff was calculated based on 104 units, whereas this one is for the 49 existing units.

The rates applied by your heat supplier are solely determined to recover all the costs incurred through operating a heat network, and no profit is made from the operation of the heat network.

Your new rates will take effect on 01/04/2024 A further tariff review will be carried out in six (6) months' time, at which point we will contact you again if the review results in any change.

### Your unit rate breakdown

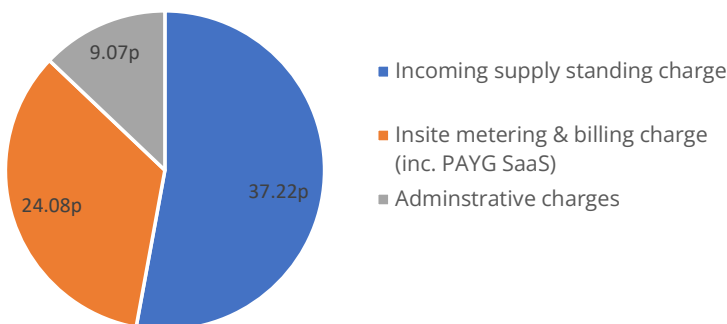

20.74 p/kwh

The average operational costs for a heat network equates to 56% of the unit rate breakdown.

### Your daily standing charge breakdown

70.37 p/day

**⚠ Please note, your heat supplier does not profit from the operation of your heat network**

### Standard components of your heat tariff

Your **unit rate** covers the bulk cost of the energy generated in the communal plant room. It also includes any associated heat losses between the supply point and your home. Your energy consumption is measured via the heat meter installed in your home, so you only pay for what you have used. You are charged for every kilowatt-hour (kWh) consumed within your property.

Your **daily standing charge** is the fixed charge passed on by your heat provider, which covers the cost of operating the heat network and delivering energy to your home. This is an annual fixed amount that is payable every day by all residents regardless of how much energy they use.

Depending on your heat provider, the costs associated with running and maintaining the heat network will either be included within your building service charge or your heating and hot water daily standing charge.
