

Set yourself up for heat network success

Bad installs cause big problems. Whether it's a retrofit or a new build, Insite Installations gets it right from day one, so you don't have to worry about handovers, compliance, or resident complaints.

RETROFITS

Smart upgrades, delivered in-house

We modernise metering and HIUs¹ with minimal disruption. Whether your site has no meters or ones that aren't working, we survey your setup and find the best-fit solution to help you bill on consumption and stay compliant.

Why it helps

Smart meter upgrades with minimal disruption.

Wired and wireless options to suit your setup.

HIU and system replacements for better performance.

Resident-first planning that keeps things simple.

Ways we support your retrofit:

- ✓ Site survey to find the best-fit metering system
- ✓ Network and property-level meter replacements
- ✓ Compliant PAYG² retrofits to support debt recovery
- ✓ HIU replacements to improve long-term reliability

NEW BUILDS

Your network simulated and stress-tested

From schematic to switch-on, we embed the right tech from day one. Our insight into live site operations means we design with long-term performance in mind, so your setup works not just on paper, but in practice.

Why it helps

Metering tailored to your scheme & budget.

Smooth coordination with M&E teams.

Fully commissioned system ready to go.

Seamless resident onboarding from day one.

Ways we support your new build:

- ✓ Metering system selected to suit your scheme
- ✓ Full commissioning services
- ✓ Fixed line installation for improved connectivity
- ✓ Resident onboarding support

WHY IT MATTERS

Installations that go beyond the basics

A smart setup sets everything else up for success. Our metering and communication systems go beyond the basics.

● Stay compliant

Accurate meters in the right places help you meet regulations and avoid penalties.

● Track performance

Monitor how your system runs to optimise energy use and reduce waste.

● Recover costs reliably

Make sure every unit of energy is accounted for, billed correctly, and paid back.

● Put residents first

Give residents peace of mind with reliable heating and easy account access.

● Catch issues early

Spot problems before they escalate, saving time and money on repairs.
